

## Corrugator Tensioning Brush

*For improved tracking & tensioning performance*

**Our Corrugated Tensioning Brush** comes in a variety of sizes and can be used in several locations on the corrugator. Brushes are designed with a Fineset Nylon Bristle and a relatively short trim length which effectively flex under light paper loads keeping the paper flat and tracking correctly.

These brushes replace standard steel idler rolls or other tracking rolls, are bored out for any size bearing you use and are very lightweight in comparison to the steel counterpart.

- Custom built for any corrugated machine
- Extremely efficient in correct tensioning
- Excellent tracking performance
- Easy to retrofit and install
- Very cost effective
