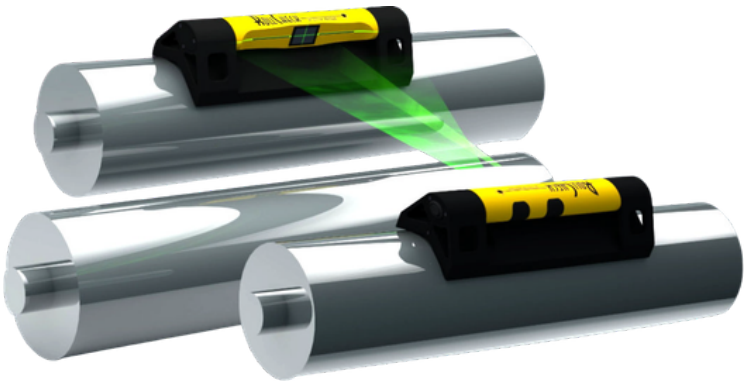
ROLLCHECK® ALIGNMENT SYSTEMS

ROLLCHECK PARALLEL ROLL ALIGNMENT INSTRUMENTS

RollCheck Laser Alignment Systems' patented design allows you to quickly and accurately bring two or more adjacent rolls into parallel alignment. It greatly reduces the time required to align rolls across countless industries, including paper, printing, metals, plastics, film, food, and textiles.



KEY BENEFITS

- Reduces downtime and product waste due to roll misalignment
- Pays for itself quickly
- Fast and easy to use, with no training required
- Facilitates more frequent roll checks
- Uses proven patented reflected laser beam technology
- Increases production with proper roll alignment
- One-person operation
- Compact design fits into small spaces
- Bright green or red laser lines
- Various models designed for small, medium, and large machines
- Rechargeable lithium-ion batteries

THE IDEAL SOLUTION TO PERFORM CORRECTIONS ON THE SPOT

RollCheck works on the entire production line no matter what size rolls.
